Did you know New Hampshire is the first government in the U.S. to conduct a formal investigation of wireless radiation risks and issue a [groundbreaking report](#) of harm along with safer ways to use today's technology?

They discovered **thousands** of [peer-reviewed, published studies](#) that link wireless radiation to our growing rates of [insomnia](#), headaches, fatigue, anxiety, depression and more. In the long-term, the [U.S. National Toxicology Program](#) has found cell phone radiation causes cancer and DNA damage. It is also a leading cause of our disappearing pollinators.

Please join us to discuss this timely issue with technology safety educators [Debra Greene](#) and [Cece Doucette](#). Debra founded [Safe Tech Hawaii](#), a grassroots coalition that passed a resolution in Hawaii County to stop 5G until it can be proven safe, successfully opposed a giant 5G drone project proposed for Kauai island and stopped two 5G towers on Maui.

Cece introduced legislation in [Massachusetts](#) and helped her schools become the [first in the nation](#) to begin safeguarding students and staff from wireless radiation. She is also an invited lecturer at the [EMF Medical Conference](#).

Debra and Cece will walk us through the issue, answer questions, and demonstrate radiation emissions from wireless technology. You'll learn simple strategies you and your loved ones can use TODAY to stay connected and protected. Feel free to invite others.

If this is new to you, consider watching the award-winning film [Generation Zapped](#) in advance (Amazon Prime, library subscriptions to [Kanopy](#) or [Hoopla](#), or [download](#) for a small fee).

IF YOU ARE UNABLE TO ATTEND BUT WOULD LIKE TO JOIN ANOTHER CONVERSATION, OR PERHAPS CO-HOST ONE OF YOUR OWN,
